LOOK
TO THE
FUTURE

Opportunities today in the textile industry are truly unlimited. New manmade and natural fibers, with their almost limitless uses, are continually opening newer and broader fields for manufacturing, research and development, design and merchandising.

Burlington Industries, a young organization, which had its beginnings in North Carolina only 34 years ago, is today the world's leading textile concern.

Because of its broad diversification, Burlington offers to the young man or woman seeking a career in textiles truly unlimited opportunities in every phase of the textile field.
